Nutzfahrzeug-Technik

## OUR PRODUCTS / SERVICES

Our product portfolio covers the conversion and / or equipment of commercial vehicles from the light van series through Fuso Canter to the new series such as Actros, Arocs, Antos, Atego, Econic, Zetros and Unimog.

### Hydraulic systems

- Introducer
- Two-way ladder
- High or low pressure
- Special systems in coordination with the end customer

### Electric

Our services range from the installation of a simple reading light, the installation of auxiliary heating systems or air conditioning systems to the installation of state-of-the-art electronic systems as well as electrical special circuits and programming.

### Chassis conversion

- Transfer of pneumatic equipment
- Replace fuel tanks
- Move AdBlue tanks
- Replace exhaust systems
- Displacement of air intake
- Offset and dissolution of device carriers
- Frame and frame overhang changes etc.
- Wheelbase changes

### Fire brigade loader, Hooklifter

On the basis of the respective tender documents we offer you the specific complete solutions.

- Fire fighting equipment
- Chassis equipment
- Cab interior
- Mounting hook lifter

### Constructions

- Roll-off tipper
- Demountable loader
- BDF frame
- Fail lift platform
- Loader crane
- Skip Loader

### Winter service equipment

Vehicle conversion to the winter service vehicle.

Our conversion program includes the installation of all winter maintenance facilities, e.g. Front plate, side plate, two-circuit hydraulic system, winter service lighting, omnidirectional lights on tripod and much more.

### Painting

Our services include:

- Cabin finishes  
(Also partial, such as roof lacquering)
- Chassis finishes
